

AUTHENTICITY VERIFICATION REPORT

Membership Certification System with Public Recording on Blockchain

Verification Result: AUTHENTIC, ACTIVE AND UNALTERABLE RECORD

Unique Certificate Identification (Certificate ID)

CERT-C14B116C16F9

Certificate Holder Data

Name: Afif Asmalendra Putra

ID Number: ****45618

Email: afif.asmalendra@gmail.com

Country: Indonesia (ID)

Verification QR code

Certified Courses/Programs

Course Name: Nicegang Premium Membership Certificate - NiceGang University

Academic Event Code: NG-0326-015

Level: Advance

Language: Indonesia

Grade: Approved

Publishing Institution: Niceguy and Nasihuy Institute

Study Period: 2026-03-05 - 2026-04-05

Publication Date: 2026-04-05

Modality: Online (Synchronous)

Instructors: Muhammad Jannah

Signatories: Rukkhadevata

Cryptographic Proof of Integrity and Public Recordkeeping

>> Verified in Smart Contract - Certify Registry

This certificate has two independent records on the public blockchain network, which perform complementary functions related to provenance, integrity, and immutability, as well as a unique cryptographic fingerprint, which allows for independent, transparent, and trusted technical verification.

Cryptographic Fingerprint of Original Document — Mathematical Identity

SHA256 Hash: bdab84b566f9460c7b27e616ca85d18d96fd07d7b25f1eae65104d2359cb9ce1

SHA-256 cryptography represents the unique mathematical identity of a certificate file. This code is generated directly from the binary content of a PDF document and cannot be repeated.

Identity Records Proof of Origin

Tx A Hash : 0xa1090c9cf8539dc7d90dd5ccbb7ff9e24270a984f5c7d27c732b73a25c33c74a

This record serves as proof of the certificate's origin. Through this transaction, the certificate's issuance intent, along with its essential metadata, including the Unique Certificate Identifier (UCI), are embedded into the blockchain. It records who issued the document, establishes the exact time of issuance, and leaves an immutable public trail of the certification action.

Integrity Digital Signature Proof of Immutability

Tx B Hash : 0x2f618237905d77852c210b1f7f917d827baa68efd7fd1882a4f119c8fb643105

This record stores a cryptographic signature (hash) of the final PDF file. It acts as a decentralized digital notary, maintaining the exact fingerprint of the original document. Any subsequent changes to the file will result in a different value.
